**SKILL GAMES LAW**  
Issued in February 2017

## MALTA SKILL GAMES LAW

As the first jurisdiction in the EU that introduced regulated remote gaming, with an average of a hundred new applications a year and being the largest EU i-gaming jurisdiction, Malta's success in the i-gaming arena is undisputed.

Malta's strategy in i-gaming has been bold and unique. The legislator decided to focus on regulation and transparency, providing a strict approach to licensing and monitoring of gaming operations. This has resulted in optimum protection for players on the one hand, to providing a regulatory solution to operators on the other, thereby achieving a balance between two opposing needs: the suppliers' and the customers'.

Malta's main advantage is the fact that it is an onshore jurisdiction. Maltese operators do not face the difficulties that offshore operators face with exchange controls, access to capital markets, access to e-wallets and payment gateways worldwide. In the case of Malta i-gaming licensees, players find comfort in knowing that they are dealing with an onshore jurisdiction whose legislation is in line with the applicable EU legislation and international agreements.

## PROCEDURE

### STAGE 1 - APPLICATION:

- Fit & Proper Test:
  - Due diligence on directors of the prospective gaming company and shareholders having 5% or more interest
  - Business Adequacy: Business plan
  - 3-year financial projections
