## Malta

Malta's success as a financial centre is owed to its unique advantages which are all combined into one reputable jurisdiction.

To start off with, Malta is situated in Europe at the heart of the Mediterranean Sea, bridging the gap between Europe, North Africa and the Middle East. Malta is a member state of the European Union and part of the Schengen Area.

Consequently, Malta enjoys the **reputation of an onshore jurisdiction** which is fully compliant with EU directives and with international standards (OECD, FATF, UN and FSF).

Even more so, Malta has been ranked amongst the **top five soundest banks** in the world. This, along with its **stable political climate**, makes Malta a secure destination for your investments.

Furthermore there are also various tax benefits which one may avail of. Upon payment of tax in Malta, one may claim a **refund** which may result in effective tax rates ranging from **0% to 6.25%**. Also, Malta enjoys an array of tax treaties with at least **68 jurisdictions**.

## Company Tax System

Companies registered in Malta are deemed to be resident and domiciled in Malta and are therefore subject to tax on their worldwide income less permitted deductions at the corporate income tax rate which currently stands at 35%.

## Full Imputation System

Malta tax resident shareholders receive full credit for any tax paid by the company on profits distributed as dividends by a Malta company, thereby avoiding double taxation on that income.

Where the shareholder would be liable to tax in Malta on the dividend at a rate which is lower than the company rate of tax any excess imputation tax credits are refundable.

## Tax Refunds

Shareholders of a Malta company in receipt of a dividend may elect to claim a refund of all or part of the Malta tax paid at the level of the company on such income. The amount of refund which may be claimed depends on the type and source of income received by the company.

Shareholders of companies having a branch in Malta receiving dividends out of branch profits subject to tax in Malta are eligible to the same Malta tax refunds as shareholders of Maltese companies.

The law requires refunds to be paid within 14 days from the day in which a refund becomes due. A refund becomes due when a complete and correct tax return for the company and shareholders is submitted, tax due is paid in full and a complete and correct refund claim is made.

In all cases, no refund may be claimed in respect of tax suffered on income derived, directly or indirectly, from immovable property situated in Malta. profits subject to tax in Malta are eligible to the same Malta tax refunds as shareholders of Maltese companies.

## 100% refund

Shareholders are entitled to a full refund of the tax paid by the company resulting in an effective combined tax rate of zero, in respect of dividends received from participating holdings

1 which fall within the safe harbours  
2 or satisfy the anti-abuse provisions or in respect of the tax paid on capital gains derived from the disposal of such holding as outlined under para 4.2 above.

### The 5/7ths refund

The 5/7ths refund applies when dividends are distributed out of profits derived from:

- passive interest or royalties
- dividends received from a Participating

Holding (as defined above) in a body of persons which does not fall within the safe harbours or satisfy the anti-abuse provisions mentioned above.

This results in an effective tax rate of 10% on passive interest and royalties or non-qualifying dividends in the hands of the shareholders.

### The 6/7ths refund

When dividends are paid to the shareholders out of any other income not mentioned above, these shareholders become entitled to claim a refund of 6/7ths of the Malta tax paid by the company. This results in an effective rate of Malta tax of 5% in the hands of the shareholders.

A numerical example of the manner in which the refund mechanism works is provided below:

### The 2/3rds refund

Where double taxation relief is claimed in respect of any foreign income received by a Malta company, the refund which a shareholder may claim is limited to 2/3rds of the Malta tax paid.

#### Effective system for relief of double taxation

- Unilateral relief, including credit system for relief of underlying tax
- Double Tax Treaty Network
- Flat Rate Foreign Tax Credit system (FRFTC)

#### Unilateral Relief

This mechanism provides a virtual double tax treaty between Malta and the rest of the world and allows a tax credit whenever foreign tax has been suffered regardless of whether Malta has a double tax treaty with such jurisdiction or not.

- that the income arose overseas;
- that the income suffered foreign tax; and
- the amount of foreign tax suffered.

The foreign tax suffered is allowed as a credit against the tax chargeable in Malta on the gross chargeable income. The credit shall not exceed

the total tax liability in Malta on the foreign sourced income.

### Tax Treaty Network

Malta has signed close to 80 Double Taxation Treaties, for the most part based on the OECD model and including double taxation agreements with all the EU Member States.

### Compliance with EU Law

The 2007 Corporate Tax Reform:

- Extension of Malta tax refund system to dividends derived by all persons from all sources;
